The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-17 and 19-22 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over WO 97/46628.

US Pat. 6,146,512 (Hoefer et al) is equivalent to the above WO, and thus the examiner points out said US Pat. 6,146,512.

Hoefer et al teach a water based electrophoretic coating composition comprising a cationic resin and a crosslinker in abstract and at col. 6, lines 9-15. The instant diester (a) is further taught at col. 3, line 60 to col. 34, line 49 and at col. 5, lines 50-67. Note that the instantly recited limitations in claims 7-17 are optional when they are combined with claim 1.

Thus, the instant invention lacks novelty.
